# Table of Contents

## Section 1  Introduction

1.1 Purpose of This Volume ............................................. 3  
1.2 Who Should Use This Volume ....................................... 3  
1.3 Related Reference Material ........................................ 3  

## Section 2  Planning, Material and Design

2.1 Sewers ................................................................... 13  
2.1.1 Pipe Material Selection Factors ................................ 13  
2.1.2 Pipe Materials and Fittings ..................................... 14  
2.1.3 Pipe Selections ..................................................... 15  
2.1.4 Requirements and Limitations for Use of Certain Pipe Material  
2.1.5 Vitrified Clay Pipe ................................................ 17  
2.1.6 Reinforced Concrete Pipe ........................................ 18  
2.1.7 Ductile Iron Pipe .................................................. 19  
2.1.8 Steel Pipe ........................................................... 20  
2.1.9 Solid Wall PE Pipe ............................................... 21  
2.1.10 Profiled Wall PE Pipe ........................................... 21  
2.1.11 Glass Reinforced Plastic Pipe .................................. 22  
2.1.12 Acrylonitrile Butadiene Styrene Pipe ......................... 23  
2.1.13 Sewer Design - General Requirements ...................... 24  
2.1.14 Flow Rate Estimations ........................................... 24  
2.1.15 Sewer Cleansing Velocities ..................................... 25  
2.1.16 Pipe Roughness ................................................... 26  
2.1.17 Design of Gravity Sewer ........................................ 27  
2.1.18 Design of Force Mains .......................................... 29  
2.1.19 Vacuum Sewerage System ...................................... 31  
2.1.20 Computerised Sewer Designs .................................. 45  
2.1.21 Design of Inverted Siphon ...................................... 45  
2.1.22 Structural Design of Sewers .................................... 46  

2.2 Manhole
  2.2.1 General
  2.2.2 Manhole Location
  2.2.3 Pipe Lengths from Manhole
  2.2.4 Structural Design Considerations for Manhole

2.3 Manhole Covers and Frames
  2.3.1 General
  2.3.2 Load Class
  2.3.3 Material
  2.3.4 Dimensions, Marking and Surface Finish
  2.3.5 Seating
  2.3.6 Casting
  2.3.7 Protective Coating
  2.3.8 Water-tightness
  2.3.9 Safety Features
  2.3.10 Product Certification

2.4 Design of Network Pump Stations
  2.4.1 Specifying of Network Pump Stations
  2.4.2 General Requirements
  2.4.3 Buffer Requirements
  2.4.4 Pipework Requirements
  2.4.5 Wet-well Requirements
  2.4.6 Dry-well Requirements
  2.4.7 Structural Requirements
  2.4.8 Ventilation Requirements
  2.4.9 Odour Control
  2.4.10 Requirements for Lighting and Electrical Fittings
  2.4.11 Acceptable Pump System (Fixed Speed Pumps Only)
  2.4.12 Valve Requirements
  2.4.13 Requirements for Level Controls
  2.4.14 Requirements for Alarms
  2.4.15 Requirements of Hydraulic Design and Performance
  2.4.16 Maintenance Considerations
  2.4.17 Hazard and Operability
  2.4.18 Other Requirements
2.5 Interceptors
  2.5.1 Oil Interceptors
  2.5.2 Grease Traps
2.6 Concrete and Reinforcement Requirements
  2.6.1 Concrete
  2.6.2 Cement
  2.6.3 Steel Reinforcement and Falsework

Section 3 Construction and Installation
3.1 Introduction
3.2 Pipes and Fittings Delivery and Handling
  3.2.1 Pipes and Fittings Delivery
  3.2.2 Pipe Handling at Site
  3.2.3 Pipe Storage
  3.2.4 Pipe Damage
3.3 Trench Excavation
  3.3.1 Protection of Affected Services, Structures, Pavements and Vegetation
  3.3.2 Excavation Requirements
  3.3.3 Bored Excavation
3.4 Pipe Laying
  3.4.1 Pipe Bedding
  3.4.2 Pipe and Fittings Placement
  3.4.3 Pipe Jacking
  3.4.4 Concrete Pipe Support
  3.4.5 Pipe Cutting
  3.4.6 Backfill of Trench
  3.4.7 Other General Requirements
3.5 Pipe Jointing
  3.5.1 Flexible Joints
  3.5.2 Solvent Weld Joints
  3.5.3 Flanged Joints
  3.5.4 Steel Pipe Welded Joints (Field Welding)
  3.5.5 Polyethylene Butt Welded Joints
3.6 Special Requirements For Sewer
   3.6.1 Thrust Blocks for Pressure Pipelines 88
   3.6.2 Pipe Restraints and Bulkheads on Steep Slopes 89
   3.6.3 Pipe Embedment and Overlay 89
   3.6.4 Slewing of Ductile Iron Pipe 90
   3.6.5 ‘Rocker’ Pipe Connections to Manholes 90

3.7 Reinstatement 90

3.8 Connections to Public Sewers 91
   3.8.1 General 91
   3.8.2 Junction Connections 92
   3.8.3 Saddle Connections 92
   3.8.4 Manhole Connections 93

Section 4  Sewer Testing

4.1 General 97

4.2 Testing of Gravity Sewers 98

4.3 Testing of Force Mains 99

4.4 Testing of Manhole and other ancillaries 100

4.5 Low Pressure Air Test 100
   4.5.1 General 100
   4.5.2 Procedure for Testing 101
   4.5.3 Procedures for Handling Air Test Failure 102

4.6 Low Pressure Water Test 102
   4.6.1 General 102
   4.6.2 Procedure 103
   4.6.3 Handling Water Test Failures 104

4.7 High Pressure Water Test 104
   4.7.1 General 104
   4.7.2 Procedure 104

4.8 High Pressure Leakage Test 106
   4.8.1 General 106
   4.8.2 Procedure 106

4.9 Test for Straightness, Obstruction and Gradient 106

4.10 CCTV Inspection 107
   4.10.1 Objectives of CCTV Inspection 107

Table 4.2 Defect Grades Descriptions 113

Appendix A Typical Drawings/Diagrams

Figure A1 Standard Manhole Cover 119
Figure A2 Plan View of Typical Manhole 120
Figure A3 Typical Shallow Precast Concrete Manhole
(Ground Level to Invert of Pipe 1.2 m ≤ Depth < 2.5 m) 121
Figure A4 Typical Shallow Precast Concrete Manhole with Backdrop
(Ground Level to Invert of Pipe 1.2 m ≤ Depth < 2.5 m) 122
Figure A5 Typical Medium Precast Concrete Manhole
(Ground Level to Invert of Pipe 2.5 m ≤ Depth < 5 m) 123
Figure A6 Typical Medium Precast Concrete Manhole with Backdrop
(Ground Level to Invert of Pipe 2.5 m ≤ Depth < 5 m) 124
Figure A7 Typical Deep Precast Concrete Manhole
(Ground Level to Invert of Pipe 5 m ≤ Depth ≤ 9 m) 125
Figure A8 Typical Deep Precast Concrete Manhole with Backdrop
(Ground Level to Invert of Pipe 5 m ≤ Depth ≤ 9 m) 126
Figure A9 Typical Details of Large Diameter Manhole (LDM) Type 127
Figure A10 Typical Induct Vent Detail 128
Figure A11 Details of Household Connection to Main Sewer
Reticulation Pipe for V.C. Pipe 129
Figure A12 Typical Details of Concrete Thrust and Anchor Block 130
Figure A13(a) Typical Details of Inverted Siphons or Depressed Sewer 131
Figure A13(b)  Typical Details of Inverted Siphons or Depressed Sewer 132
Figure A14(a)  Typical Details for Force Main – Scour Valve and Receiving Manhole (Sheet 1 to 2) 133
Figure A14(b)  Typical Details of Force Main – Air Valve (Sheet 1 to 2) 134
Figure A15  Typical Detail of Force Main Crossing 135
Figure A16(a)  Standard Pipe Beddings (Sheet 1 to 2) 136
Figure A16(b)  Standard Pipe Beddings (Sheet 1 to 2) 137
Figure A17  Vacuum sewage collection system 138
Figure A19(a)  Example of vacuum station with housed collection vessel 139
Figure A19(b)  Example of vacuum station with housed collection vessel 140
Figure A20(a)  Collection chambers with interface valves vented through breather pipes 141
Figure A20(b)  Collection chamber with interface valve activated by float 141
Figure A20(c)  Multi-valve collection chamber 142
Figure A21  Vacuum sewer profiles (not to scale) 143
Figure A22  Example of vacuum sewer profiles for uphill and downhill transport (not to scale) 143
Figure A23  Y-branch for vacuum sewer 144
Figure A24  Method of joining crossover pipes and branch sewers to vacuum mains 144
Figure A25  Typical details of dry-well pump station 145
Figure A26  Typical detail of wet-well pump station 146
Figure A27  Buffer Zone for Pump Station with Super Structure 147
Figure A28  Buffer Zone for Pump without Super Structure 148
Figure A29  Standard Symbols and Abbreviations 149
